TRENDSETTING MEETS TIMELESS

BY: USI Remodeling, Grand Prairie

LOCATION: Coppell

PROJECT COST: Between \$30,000 and \$40,000

While the caddy-corner garden tub was a prominent fixture in this master bathroom, the homeowners never used it. So they turned to the experts at USI Remodeling to transform the space into one that met their personal needs. The first task at hand was to remove the tub altogether, making way for a much larger, four-wall shower that sits on a diagonal in the room and features all of today's best bells and whistles, including body sprays, handheld shower fixtures, a rain showerhead, a seating area and more. The space that was once home to the tub became the perfect setting for a custom linen cabinet, which provides the homeowners with more storage space than ever before. USI Remodeling's upscale design also called for new cabinets, travertine floors, lava-granite countertops, black plumbing fixtures, custom mirrors with tile surrounds and an overall color-scheme change to rich, dark, dramatic hues. The finished master bathroom exudes Old World charm but will remain timeless in its motif as years go by.

MATERIALS/SUPPLIERS

Cabinetry: Kent Moore Cabinets LTD • **Mirrors:** Don Carter Glass

Plumbing Fixtures: Goodman Supply Company

Tile and Granite: Arizona Tile
